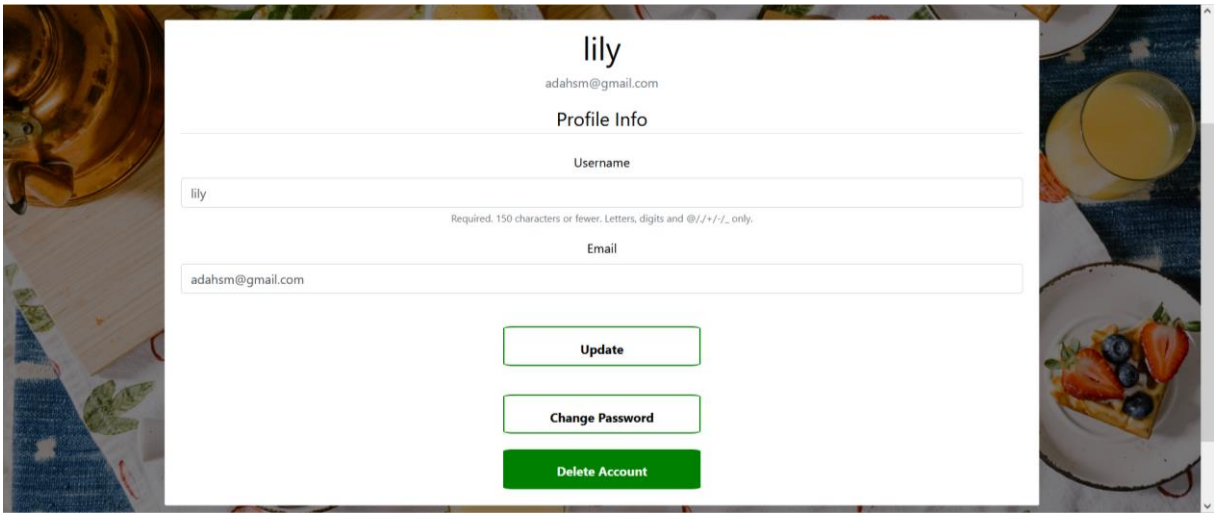
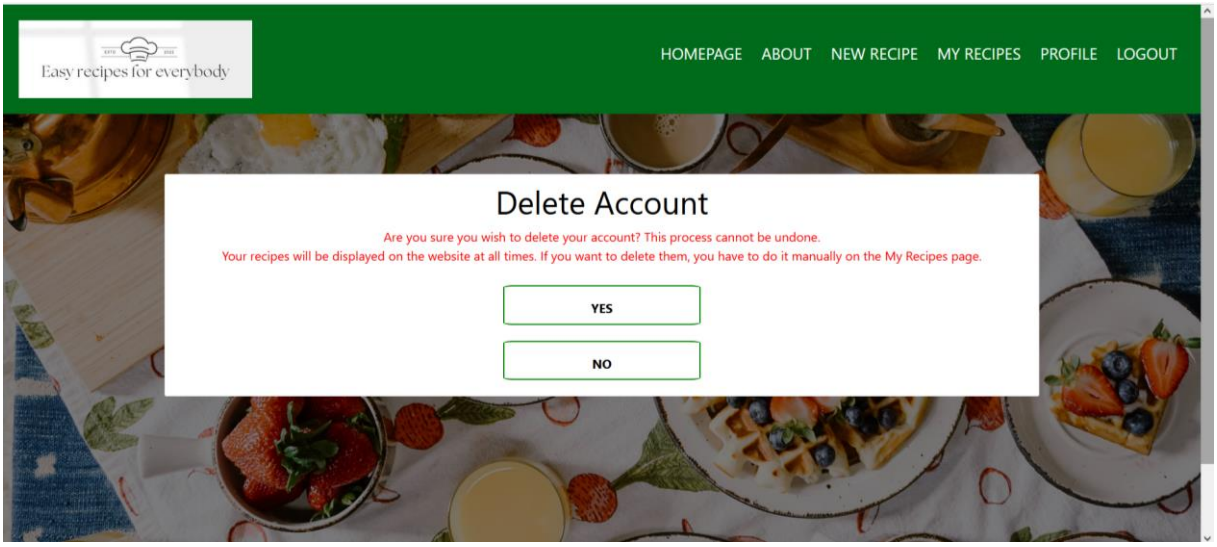
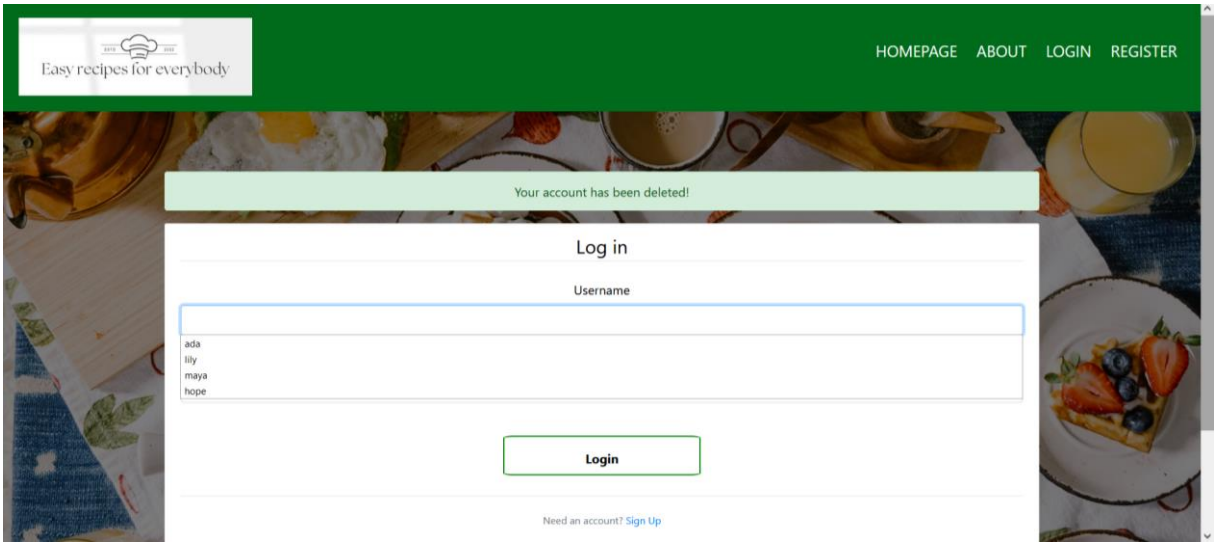
Delete Account page Design document



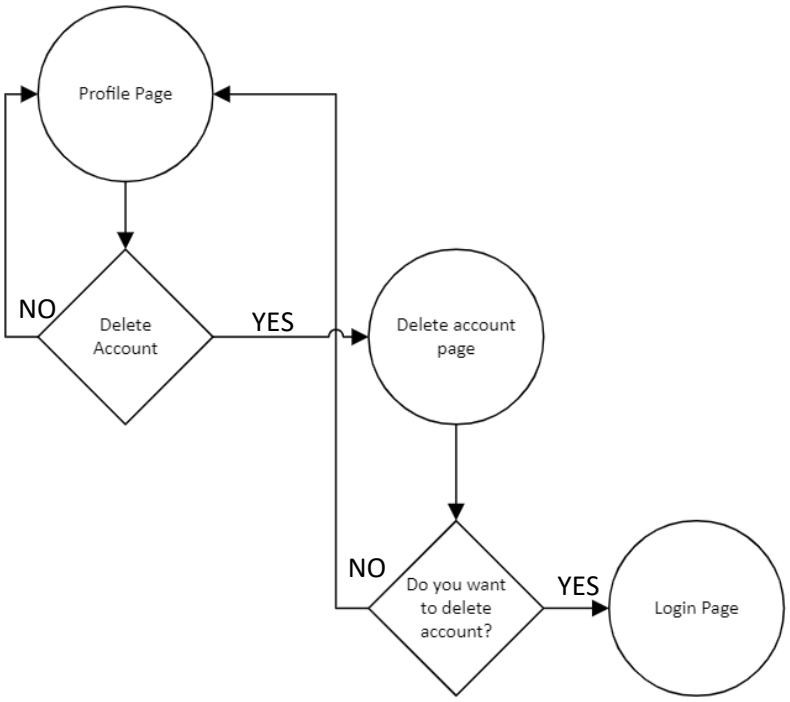




1. Delete account page

When user is successfully login to the website he/she is able to delete his/her own account. User needs to go to Profile Page and then click button DELETE ACCOUNT. After this, he/she is moved to the Delete account Page. On the top of the screen user is able to see navigations menu bar with six button and website logo. All of the buttons are moving user to the dedicated pages. On the screen user is able to see message – Are you sure you wish to delete your account? This process cannot be undone. Your recipes will be displayed on the website at all times. If you want to delete them, you have to do it manually on the My Recipes page. – and two buttons – YES and NO. Button NO is moving ser to the Profile page again and button YES is deleting the user account and move user to Login Page.

2. URL diagram



3. User Story

User is able to delete account only when he/she is successfully login to the website ang he/she will go to Profile Page. When user do that he/she pressed button Delete Account and user is moving to Delete Account Page. Then he/she needs to answer the question - Are you sure you wish to delete your account? This process cannot be undone. Your recipes will be displayed on the website at all times. If you want to delete them, you have to do it manually on the My Recipes page . If user wants to delete all recipes too, he/she needs to press button NO and go to My Recipes Page and delete each of the recipe manually and then come back to Profile Page, press button – Delete Account and after he/she is moving to Delete Account Page, user needs to press button YES. If user wants to leave all of the recipes on the website, he/she can press button YES right away.

4. Acceptance Criteria

The page should display message, two buttons and navigation menu. Each button should be clearly named. Seven of eight buttons should move user to connecting pages:

- Homepage to homepage
- About to about page

- New recipes to Add recipe page
- My recipes to my recipes page
- Profile should reload the page
- Logout to logout page
- NO to Recipe Page

YES button should change value active next to the user which wants to delete account and then the user is not longer able to login to the website. After user pressed it he/she should be moved to Login page and ultimately log out from the website.

5. User interface – Pseudo code

The Delete Account page is appear for the user when he/she is successfully log in to the website and after he/she went to the profile page and he/she pressed button – Delete Account. On the client side is to press button YES or NO. On the server side is when user press button NO – move him to profile page, when user press YES – logout him from the page, change active value in database to false next to his/her username and move user to Login page.
