

# Delete Recipe page Design document

## 1. Delete recipe page

When user is successfully login to the website he/she is able to add recipe, edit recipes and delete recipes. To delete recipe user needs to go to My Recipe page and click on the recipe which he/she wants to delete. Then on the screen is appear all details about recipe with red button DELETE on the top of the recipe. When user will click on this button he/she is moving to Delete Recipe Page. On the screen is appear message – Are You sure, you want to delete this recipe? – and two buttons – Yes, delete and Cancel. On the top of the screen is navigation menu with 6 buttons – Homepage, About, New Recipe, My Recipes, Profile and Logout. All of the buttons are moving user to the dedicated pages.

## 2. URL diagram

## 3. User Story

User is able to delete only the recipes which he/she created. He/she wants to do it, so user is going first to the My Recipe Page, choosing the recipe which he/she wants to delete, clicking on this recipe and then on the top of the recipe user is able to see red button DELETE. User is clicking the red button DELETE and he/she is moving to Delete Recipe Page. On the screen he/she see message is he/she sure that user wants to delete the recipe. Because user wants to delete it he/she is clicking Yes, Delete button. Recipe is delete. Nobody is no longer able to see this recipe.

## 4. Acceptance Criteria

The page should display message, two buttons and navigation menu. Each button should be clearly named. Seven of eight buttons should move user to connecting pages:

- Homepage to homepage
- About to about page
- New recipes to Add recipe page
- My recipes to my recipes page
- Profile should reload the page
- Logout to logout page
- Cancel to Recipe Page

Yes, delete button should delete recipe from database and move user to the HomePage.

## 5. User interface – Pseudo code

The Delete Recipe page is appear for the user when he/she is successfully log in to the website and when user chose his/her recipe which he/she wants to delete. On the client side is to choose the button Yes, delete or Cancel, to choose the button what next he wants to do with this recipe. On the server side is to delete recipe from database if user will press button Yes, delete or move user to the specific site which user chose on the navigation menu or by clicking button cancel.
