

Recipe Detail page Design document

1. Recipe Detail page

User doesn't need to be login to the website to go to Recipe Detail page. On the screen user is able to see whole recipe detail for recipe which he/she chose on the HomePage or My recipe page. He/she is able to see very important warning - This recipe can contain allergens, please check it before cooking! – to make sure that user will check carefully whole ingredients before he/she will eat it. Then the user is able to see the name of the person which create this recipe and date when the recipe was created. If user is login to the website and he/she chose his/her recipe, user is able to see two buttons – UPDATE and DELETE – to update and to delete the recipe. Under this user is able to see – name of the recipe, photo, Ingredients, Instructions and Nutrients. On the top of the screen is located navigation bar menu with buttons to dedicated them pages and the logo of the website.

2. URL diagram

3. User Story

User is able to view all of the details of all of the recipes. He/she is able to do that by going to the HomePage and clicks on the recipe or going to the My Recipe Page and did the same. User doesn't need to be login to the website to see the recipe details. User wants to find recipe for himself/herself and he/she wants to see all details. User needs to go to the homepage, find the recipe and clicks on the recipe and then he/she will be move to Recipe Detail page.

4. Acceptance Criteria
